PROFESSIONAL SUMMARY

Aspiring Python Development intern with hands-on experience building web applications, RESTful APIs, and applied machine learning prototypes. Experienced in data collection, preprocessing, feature engineering, model training and evaluation using Python (pandas, numpy, scikit-learn) and integrating models into web services (Flask/Django). Comfortable with experimentation, hyperparameter tuning, model validation, and deploying models as REST endpoints. Strong collaborator using Git; eager to learn advanced AI concepts and contribute to real-world AI projects. Available immediately for a 3-month remote internship.

TECHNICAL SKILLS

Programming: Python, TypeScript

Data Machine Learning: pandas, numpy, scikit-learn, PyTorch (basic), TensorFlow (basic), Jupyter, matplotlib, seaborn, data preprocessing, feature engineering, model evaluation, hyperparameter tuning

Web Frontend: HTML, CSS, Responsive Design, React, Vite, Tailwind, Axios

Backend APIs: Django, Flask, Node.js, Express, RESTful APIs, JWT, bcryptjs, Zod

Databases: MongoDB, Mongoose, MySQL

Containers Deployment: Docker, Docker Compose, REST model endpoints

Tools: Git, GitHub, Visual Studio Code

PROJECTS

Smart Leads Dashboard | *React, TypeScript, Node.js, Express, MongoDB, Docker*

- Built role-based leads dashboard with JWT auth and RBAC.
- Implemented REST APIs for CRUD, pagination, filtering, sorting, and CSV export.
- Developed a lead-scoring prototype: collected and preprocessed historical lead data, engineered features, trained and validated a classification/regression model (scikit-learn), and exposed predictions via a REST endpoint for priority ranking.
- Hardened backend with TypeScript, Mongoose schemas and Zod validation; integrated frontend (React + Vite + Tailwind) with debounced search and light/dark themes; Dockerized services.

AI Tools Dashboard | *React / REST APIs*

- Dashboard with interactive charts and REST endpoints for tools and country data; added model evaluation visualizations and endpoints for serving simple ML inferences.
- Responsive UI and modular components for charts, filters, and tables.

Flipkart Chatbot | *Python / Flask*

- Prototype chatbot with Flask backend and templated web UI; implemented basic NLP pipeline for intent classification and slot extraction using Python libraries and integrated it with the service endpoints.
- Modular project layout and reusable templates for consistent UI; focused on model evaluation and iterative improvement.

EXTRA LEARNING

- Self-study of machine learning fundamentals, data preprocessing, feature engineering, and model evaluation through online coursework and hands-on projects.
- Exploring web development, responsive design, and modern UI patterns; practicing collaborative software development workflows using Git and GitHub.

EDUCATION

Pandit Deendayal Energy University

July 2023 – May 2027

B.Tech – Computer Science and Engineering | CGPA: 7.77 / 10.00

Relevant Coursework: Object-Oriented Programming (OOP), Database Management Systems (DBMS), Data Structures & Algorithms (DSA), Operating Systems, Discrete Mathematics, Machine Learning (self-study / coursework)

CODING PROFILES

HackerRank: hackerrank.com/Dipesh038

GitHub: github.com/Dipesh038

Selected projects: Smart Leads Dashboard (Node/React); Flipkart Chatbot (Python/Flask)

ACHIEVEMENTS & CERTIFICATIONS

- **AWS Certified Cloud Practitioner:** AWS foundational cloud certification covering core services, security, and pricing basics.
- **Rural Internship – Future Technology:** Worked on technology-driven solutions addressing practical challenges and improving problem-solving skills.
